Professional Summary

- Experienced IT Technician with a strong background in managing technology infrastructure, troubleshooting, and full-stack software development. Contributed to codebase enhancements in collaborative projects, showcasing expertise in JavaScript, C#, HTML/CSS, and Razor Syntax. Demonstrates a versatile skill set for effective technical support and project collaboration.

Experience

Library Tech Assistant | [Life Christian Academy](#)

August 2023 – Present

- As the IT Technician and Librarian at Life Christian Academy, I manage the school's tech infrastructure, troubleshoot IT issues, and maintain a secure network. Simultaneously, I curate the educational library, oversee check-ins and check-outs, and assist students and faculty in utilizing digital resources. My blend of technical expertise and library science skills contributes to the school's technological advancement and educational enrichment, enhancing the overall learning experience.

Developer | [Prosper IT Consulting](#)

Mar 2020 – Jul 2020

- I collaborated in a diverse team on an MVC/MVVM Web App, using JavaScript, C#, HTML/CSS, and Razor Syntax. Our focus was on enhancing the existing codebase, adding features, and resolving bugs. Tasks included addressing JavaScript errors, code reformatting, and implementing new features. My contributions covered a broad spectrum of development tasks within the project stories.

Software Developer | [Smarta](#)

Mar 2018 – May 2019

- I skillfully utilized the dynamic capabilities of JavaScript and React, coupled with the aesthetic finesse of Material UI, to architect and bring to life the foundational software and web application. By seamlessly translating meticulously crafted UI screens from Figma into a tangible digital experience, I contributed to the transformation of conceptual designs into fully functional and engaging web pages, ensuring a harmonious blend of form and functionality.

Education and Training

Certification in Software Development | The Tech Academy

- The Tech Academy's immersive boot camp provides over 600 hours of instruction in C#, ASP.NET, JavaScript, HTML5, CSS3, and T-SQL/SQL. Beyond coding, participants learn Agile/SCRUM methodologies and web application development nuances. Practical projects showcase proficiency in MVC, LINQ to SQL, EF6, and JavaScript, offering a well-rounded skill set.
